

SoftGrowTech Data Analysis Internship – Final Project

Overview

This repository contains my submission for the **Final Project** of the **Data Analysis Internship** at **SoftGrowTech**. It focuses on solving real-world data problems and presenting insights in a structured, meaningful way – covering both business analysis and interactive dashboard design.

Repository Structure

```
├──  
BusinessDataAnalysisProject/  
|   ├── README.md  
|   └── (notebook/code +  
dataset)  
|  
└── InteractiveDataDashboard/  
    ├── README.md  
    └── (dashboard file +  
dataset)
```

Projects

1 Business Data Analysis Project

Analyzes a real-world business dataset to generate insights

using charts and reports, clearly explaining the patterns and trends found.

 [View Project](#)

Interactive Data Dashboard

Builds an interactive dashboard that visualizes data using graphs and charts, helping users understand data easily.
